How it works

Simply apply on-line. Our system will give you the opportunity to complete your master profile page, and then assign memberships to co-workers. All you need is their name and email address. Then tell them to login and create their own password and profile. Designate a Key Contact that can easily add/change/delete employee names if needed. It's simple and most important ... if you're active in CCFS, then Institutional Membership pays for itself. Contact us if questions arise.
